Air Compressors | Battery Chargers | Jump Starters | Power Inverters | Power Stations | Spotlights

BATTERY CHARGERS

Battery chargers use AC (household) power to recharge automotive-type batteries. Black & Decker's innovative 3-stage process provides for an efficient and stable charge by automatically regulating both voltage and amperage through each stage. This "Smart Charge" method, extends the serviceable life of the battery by preventing overcharging or overheating.

BM3B-CA 1.5 Amp Battery Maintainer/ Trickle Charger

- 6V and 12V battery maintainer
- Keeps 6V and 12V battery systems at optimal capacity
- Fully automatic high frequency charging
- Reverse polarity protection
- 3 ways to connect: Battery clips, 12V DC accessory plug and battery ring terminals
- Built in mounting brackets

6-12V BATTERY TYPES

POLARITY PROTECTION

ROTATING HOOKS

DXAEC2-CA 2 Amp Battery Charger and Maintainer

- High frequency battery charger for most 6 volt and 12 volt automotive battery types
- Automatically activated to keep the battery at optimal capacity once it's fully charged
- Impact resistant heavy-duty housing
- 6' Heavy duty power cord for long reach
- Battery clamps and ring terminals for connection
- Flip-up hook makes hanging easy and LED charging status indicators

WATERPROOF

POLARITY PROTECTION

ROTATING HOOKS

DXAEWPC4-CA 4 Amp Waterproof Battery Charger and Maintainer

- 4 Amp high frequency battery charger/maintainer
- Charge and maintain most 12 volt battery types
- Trickle charging mode is automatically activated to keep the battery at optimal capacity once it's fully charged
- Waterproof IP67. Ideal for moist environments, protected against water submersion for 30 minutes up to 3 feet in depth
- Detachable 360° rotating hook and mounting holes
- Power indicator and LED charging status indicators
- Powder coated metal clamps and ring terminals
- 6' heavy duty 120V AC power cord

6-12V BATTERY TYPES

POLARITY PROTECTION

HIGH EFFICIENCY

BATTERY MAINTAINER

MICROCHIP

MICROCHIP

DXAEC10-CA 10 Amp Charger/ 3 Amp Maintainer

- 10 Amp High Frequency Battery Charger for most automotive battery types: AGM, GEL, WET and Lithium
- 3 Amp Maintainer automatically activated to keep the battery at optimal
- Rubber over molded housing
- Battery clamps for easy connection
- 6V/12V button to select battery voltage. 12V only for Lithium LiFePO40
- Alternator check button
- LCD Screen with instant feedback
- 6' heavy duty power cord

BATTERY CHARGERS

BC15BD-CA

40 Amp Engine Start, 15 Amp Charger/2 Amp Maintainer

- Fast, high frequency technology
- Most efficient: 15 Amp continuous charger and 2 Amp maintainer
- Patented alternator check
- Cord/cable wrap/clamp storage
- One touch automatic charging
- Reverse polarity protection
- LCD screen with easy to read icons

BC25BD-CA

75 Amp Engine Start, 25 Amp Charger/ 2 Amp Maintainer

- Fast, 75 Amp engine start
- Most efficient: 25 amp continuous charger and 2 Amp maintainer
- Cord/cable wrap/clamp storage
- One touch automatic charging
- Digital battery diagnostics

DXAEC100-CA

100 Amp Engine Start, 30 Amp Battery Charger/3 Amp Maintainer

- 30 Amp High Frequency Battery Charger with a 3 Amp Maintainer
- Charge and maintain most 12 Volt Lead Acid battery types
- 100 Amp Engine Start. Helps to start most vehicles in seconds
- Trickle charging mode is automatically activated to keep the battery at optimal capacity once it's fully charged
- Rubber padded tray
- 6' 120V AC power cord
- Easy to read LCD screen. Instantly displays battery voltage at the touch of one button
- Battery charge button
- Rugged housing design
- Heavy duty powder coated all metal battery clamps with 6' cables

DXAEC200CA

200 Amp Engine Start, 40 Amp Battery Charger/3 Amp Maintainer

- 40 Amp Battery Charger with a 3 Amp Maintainer
- 200 Amp Engine Start. Helps to start most vehicles in seconds
- Tests the vehicle's alternator to indicate if operating correctly
- Trickle charging mode is automatically activated to keep the battery at optimal capacity once it's fully charged
- Electric pulse technology can help reverse sulfate build-up on battery plates to improve charge capacity and extend battery life
- Instantly displays battery voltage at the touch of one button
- Provides automatic low voltage and temperature compensation, spark resistant and reverse hook up protection
- Easy to read LCD screen with clear information

POWER INVERTERS

Power inverters convert your vehicle's DC power to AC (household) power. Some models come with an adapter that plugs into the DC accessory outlet (cigarette lighter) of the car or truck. Using this adapter you can pull up to 140 watts which is ideal for small electronics. Other models include clips that allow you to connect directly to the battery. This attachment method is ideal for camping or as a power supply on the job site.

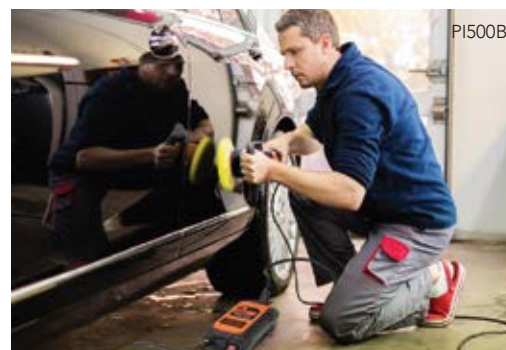

DXAEP140-CA 140W Power Inverter

- 120V AC outlet with protective cover
- 3.1A dual USB power outlets
- Power button with LED indicator
- 14-gauge 3 ft. power cord
- Tough and durable 12V DC plug
- Built-in install bracket

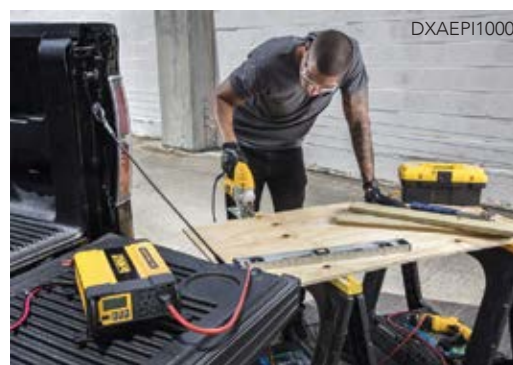

DXAEP1000-CA 1000W Power Inverter

- 1000 watts of continuous AC Power that's perfect for a tailgate or jobsite; enough to power drills, work lights and more
- Dual 120V AC outlets and triple USB ports to power multiple devices at the same time
- Heavy duty aluminum housing with impact-resistant polymer trim and integrated grommets for easy mounting and installation
- Easy-to-read backlit LCD screen provides vital information at a glance
- Built in ground fault, short circuit and low battery protection
- Backlit Power button w/Power and Fault indicator

PI500B-CA 500W Power Inverter

- 500 watts of continuous household power on-the-go (or up to 140 watts through your car's 12V DC outlet)
- Dual 120V AC outlets and 3.1 Amp USB ports can charge/power multiple devices at the same time
- Connect with the included 12V DC plug or pop the hood and use the battery terminal clamps
- Durable, injection-molded polymer housing built to withstand rugged use
- Power button and automatic low-voltage cutoff preserve your vehicle's battery

SPOTLIGHTS & AIR COMPRESSORS

Black & Decker® spotlights are ideal for camping, roadside emergencies, power failures and more.

Stanley® Air Compressor and digital tire inflator will get you back on the road in minutes when your tire pressure is low.

CDC120S-CA Stanley AirPro 120 PSI 12V Corded Air Compressor with Digital Gauge

- Features Sure Fit nozzle with Autostop functionality for easy inflation
- Built in backlit digital display for reading PSI at a glance
- Comes with sports nozzle for inflating balls and sports equipment
- Extended cord helps you reach all four vehicle tires

CDC120S

SLV2B

750
LUMEN

SLV2B-CA Black & Decker LED Li-Ion Rechargeable Spotlight

- 750 lumens
- Li-Ion rechargeable via micro USB Port
- Ultra-bright center LED
- 2 ambient LEDs for extended runtime
- Up to 7 hours of runtime
- 2 Amp AC USB charger
- USB charging cable
- Dual position handle/stand
- ETL certified

JUMP STARTERS & POWER STATIONS

A Jump-Starter is a portable and rechargeable unit that connects directly to your vehicle's 12V battery with clamps. It is ideal for jump starting in emergencies, without needing another vehicle or battery. It's compact enough to store within the vehicle.

J312B-CA

700 Peak Amp Jump Starter

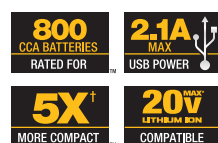

- Delivers 700 peak Amp of jump-starting power which is Ideal for most V6 engines in cars and light duty trucks.
- Reverse polarity alarm alerts when there is an improper connection; Connect the clamps to the battery, turn on the switch and start your vehicle.
- 3.1A USB port provides portable power for electronic devices
- Meets ETL safety standards for performance and safety.
- Charges using a standard household extension cord (sold separately)
- High-intensity LED work light for roadside repairs

DXAE20VBB-CA (Tool only — Battery not included)

800 CCA Automotive Cordless Jump Starter/Battery Charger

- Rated for use with 800 CCA (Cold Cranking Amp) batteries and engines up to V8
- Use your own DeWalt 20V XR 5 AH Lithium-Ion Battery Pack to boost most vehicle batteries (DeWalt 20V battery not included)
- Battery Booster for AGM, GEL and WET 12V batteries
- Dual high-output 2.1 Amp USB ports to recharge personal electronics on the go.
- Compact design makes it easy to store and transport.
- LED area light ideal for roadside repairs
- Comes with attached heavy-duty jumper cables.

DXAELJ16-CA

1600 Peak Amp Automotive Starter with USB Power Bank

- Up to 30 Jumps on a Single Charge. 1600 peak amp of starting power perfect for vehicles up to V8
- 3X Faster Recharge Capacity, charge and then jump start a car in as little as 15 minutes
- Rechargeable Lithium Battery comes with both AC and DC adapters to help you recharge from practically anywhere
- USB Charger. Charge and power your computers, laptops, tablets, phones, gaming devices and more on the go
- LED Work Light. Bright LED work light helps with roadside repairs after dark
- Rechargeable lithium battery charges up in as little as 5 hours and keeps a charge up to 6 months

JUMP STARTERS & POWER STATIONS

More Powerful 1600 Peak Amp Jump Starter
with USB-C Technology

1600 PEAK AMP - AGM JUMP STARTER	120 PSI AIR COMPRESSOR	15W MAX USB-A POWER	25W MAX USB-C POWER	TEST ✓ ALTERNATOR
---	-------------------------------------	----------------------------------	----------------------------------	--------------------------------

DXAEJ14-CA

1600 Peak Amp Jump Starter with 120 PSI Compressor

- 120 PSI digital air compressor (w/auto shut off) and Sure Fit™ nozzle to inflate vehicle tires and sports equipment
- Dual USB Charging Port (USB-A: 15W and USB-C: 25W), charge up to 2 personal devices on the go
- Alternator check to test your vehicle's alternator
- Reverse polarity alarm warns user if connected improperly
- Heavy-duty welding cables help deliver all the power with easier connection
- High-intensity LED work lights for roadside repairs
- ETL Certified. Safety testing to UL standards

DXAEPS14-CA

2000 Peak Amp Jump Starter with 120 PSI Compressor and 500-Watt Power Station

- 120 PSI digital air compressor (w/auto shut off) and Sure Fit™ nozzle to inflate vehicle tires and sports equipment
- 500 watt job-site power — dual 120V AC outlets
- USB Charging Ports – USB-A 15W Max and USB-C 25W MAX
- Reverse polarity protection with audible alarm
- LED area light
- Heavy duty cables (4AWG) and metal coated clamps
- CETL certified for safety
